SUMMARY

Java Backend Engineer with 5+ years of experience building scalable distributed systems using Java, Spring Boot, Microservices and AWS. Experienced in designing REST APIs, event-driven architectures, scalable backend applications and high-performance backend services handling 50k+ daily requests.

EXPERIENCE

SulAmérica

Java Backend Engineer

Brazil (Remote)
08/2021 - Present

- Developed and maintained Java Spring Boot backend services supporting **50k+ daily requests**, contributing to the migration of critical modules into a scalable microservices architecture.
- Designed and implemented REST APIs consumed by internal and external systems, reducing integration bottlenecks by **15–20%**.
- Improved production reliability by troubleshooting critical issues, reducing recurring incidents by **30–40%**.
- Built integrations with third-party services across distributed systems.
- Collaborated in Agile teams using Jira and Confluence.

PalmSoft Tecnologia

Technical Lead | Backend Engineer

Brazil (Remote)
09/2022 - Present

- Led a team of **6 engineers**, defining architecture, technical direction and improving delivery consistency.
- Designed and implemented scalable backend services, microservices and REST APIs using Java and Spring Boot in AWS environments.
- Collaborated directly with clients to translate business requirements into scalable software solutions.
- Improved development efficiency through code reviews, technical mentoring and architecture guidance.
- Implemented CI/CD pipelines, Docker containerization and AWS deployment practices.
- Designed integrations with internal and third-party systems using SQL and NoSQL databases (MongoDB, DynamoDB).

Mid-Level Backend Developer

Brazil (Remote)
08/2021 - 08/2021

- Developed backend solutions across multiple business domains using Java and Spring Boot.
- Led the implementation of a multifunctional platform covering rental, food, transport and services, becoming the primary developer after the architecture phase.
- Adapted system architecture to evolving business requirements while maintaining delivery pace.
- Contributed to frontend development using React, integrating user interfaces with backend services.

Junior Back-End Developer

Brazil (Remote)
03/2019 - 08/2021

- Developed backend applications using Java and Spring Boot across multiple projects.
- Implemented CI/CD pipelines to improve deployment reliability.
- Contributed to frontend development with React when required.

SKILLS

- Java
- SQL
- TypeScript
- JavaScript
- Spring Boot, Spring Data JPA, Spring Security
- Hibernate
- REST APIs, SOAP
- Microservices
- Event-Driven Architecture
- Kafka, SQS, SNS
- Distributed Systems
- AWS
- Docker
- Kubernetes
- CI/CD
- PostgreSQL
- MySQL
- Oracle
- MongoDB
- DynamoDB
- Git, GitLab, GitHub, Bitbucket
- Unit Testing, Integration Testing, Functional Testing, TDD
- Design Patterns
- AI-assisted software development (ChatGPT, Claude, Gemini)

KEY ACHIEVEMENTS

- Led 6-engineer backend team.
- Supported 50k+ requests/day.
- Reduced production incidents by up to 40%.
- Improved API integration performance by 20%.

EDUCATION

Bachelor, Computer Science - Universidade do Vale do Itajaí
01/2016 - 07/2021

Postgraduate Degree (In Progress), Software Architecture,
Cybersecurity and Data Science - Pontifícia Universidade Católica do
Paraná

03/2026 - 03/2027
